

Ninth Wave Secures Lloyds TSB Contract to Implement PAT System

(Published: 15 February 2008)

Ninth Wave today announces the implementation of its PAT system within Lloyds TSB, on an enterprise-wide basis.

PAT will provide consistent change management, reporting and governance processes for Lloyds TSB's project portfolio, which crosses all business units of the Bank.

"Lloyds TSB has well established change management processes and PAT provides the solution to enforce their use in a consistent, efficient and effective manner. It will help support the evolving needs of the Bank, providing a flexible and scalable software solution that can be adapted to meet our on-going requirements."

Derek Radcliffe, Change Management Services Director, Lloyds TSB

"We recognise that every client is both unique and in a constant state of flux. PAT has been specifically designed to be able to meet the specific needs of large and complex organisations. It is exciting to be working with the Lloyds TSB's change management team to implement a leading edge solution for project governance and change management."

Richard Meakin, Director, Ninth Wave

Ninth Wave is able to provide a complete end to end solution, from initial design through to live support.

- ENDS -

Notes to Editors:

About Lloyds TSB

Lloyds TSB is a leading UK-based financial services group whose businesses provide a comprehensive range of banking and financial services in the UK and overseas. At the end of 2006 total group assets were £344 billion and there were some 63,000 employees. Market capitalisation as at that date was some £32 billion. Profit before tax for the 12 months to 31 December 2006 was £3,713 million.

Lloyds TSB Group's activities are organised into three businesses, UK Retail Banking, Insurance and Investments, and Wholesale and International Banking.

About Ninth Wave and PAT

Ninth Wave is a United Kingdom based software and consulting company, established in 1995 and specialising in providing programme, project and IT management software and services. Ninth Wave has gained considerable experience of best practice through a range of engagements with leading UK and international organisations.

Ninth Wave's PAT (Process Adaptive Technology) solution is used for a wide range of applications, including programme, portfolio, project, risk, resource and document management. PAT is entirely configurable through the web browser to meet a wide range of organisational and individual information needs. PAT can be configured rapidly, provides a shared environment for thousands of users over the internet, integrates with a wide range of other applications, and provides powerful and flexible workflow, dashboards and reporting.

PAT provides a tried and tested solution that can be rapidly configured by business users to meet current and future requirements and is delivered and supported by a skilled and experienced team. It may be installed in-house, or hosted from Ninth Wave's own servers.
